SRS — LerenGO

1. Introduction

1.1 Purpose

Define requirements for **LerenGO**, a web-first platform for **guided learning** where students get academic help primarily from **their own university mentors**, and learning artifacts remain **campus-private**, not public.

1.2 Product Summary

LerenGO provides:

- **Guidance:** doubt solving + mentorship
- **Campus Learning Base:** solved content searchable **only within the same university**
- **Evidence Profiles:** proof-based reputation for mentors/students
- (Later) outcomes, jobs/internships, freelancing

---

2. Core Principles (Non-Negotiable)

1. **University-first trust:** same-university mentors prioritized.
2. **Private by default:** solved doubts are visible only to that university's verified users.
3. **Proof > claims:** profiles are evidence-driven.
4. **Governance is built-in:** reporting/moderation exists before scaling.

---

3. User Roles

- **Student**: asks doubts, receives guidance, views campus knowledge base.
- **Mentor (Peer/Senior)**: responds to doubts, earns reputation, later earns money.
- **Admin/Moderator**: handles reports, bans, quality control.
- (Later) **Faculty**, **Recruiter**, **Freelancer**

---

4. Functional Requirements

4.1 Authentication & University Verification

FR-AUTH-1: User can sign up/login via:

- **Google Sign-In**
- **Apple Sign-In**

FR-AUTH-2: User must provide/select:

- University/College
- Department/Branch
- Semester

FR-AUTH-3 (Domain verification):

- User must verify email domain matching their university domain (e.g., @uni.edu).
- If domain does not match: access is restricted (cannot post/view campus content).

FR-AUTH-4: Role system:

- Default role: Student
- Mentor is earned via application or admin approval (Phase 2)

4.2 Doubt Posting (Student)

FR-DOUBT-1: Student posts a doubt with:

- Title (optional)
- Description (required)
- Subject/topic tag (required)
- Image attachment (optional now; recommended)

FR-DOUBT-2: Doubts default to **campus scope**:

- Visible only to verified users of that university.

FR-DOUBT-3: Student can mark urgency:

- Normal
- Priority (paid later)

4.3 Mentor Matching + Acceptance

FR-MATCH-1: System prioritizes mentors from the **same university**.

FR-MATCH-2: Filtering by subject/topic.

FR-MATCH-3: Mentor can accept/decline.

FR-MATCH-4: Once accepted, system creates a thread.

4.4 Messaging / Thread

FR-CHAT-1: Thread supports text messages.

FR-CHAT-2: Supports image attachments.

FR-CHAT-3: Stores timestamps for response-time metrics.

FR-CHAT-4: Block/report available within thread.

LerenGO

4.5 Resolution + Rating

FR-RES-1: Student marks doubt as solved.

FR-RES-2: Student rates mentor (1–5) + optional feedback.

FR-RES-3: Mentor metrics update:

- Solve rate
- Avg rating
- Response time

4.6 Campus Knowledge Base (Solved Doubts Library)

Key change from earlier: NOT public.

FR-KB-1: Solved doubts become searchable inside the same university.

FR-KB-2: Search + filter:

- Subject/topic
- Semester/course (optional)
- Most helpful / most viewed (later)

  FR-KB-3: Admin can remove/hide items.

4.7 Profiles (Evidence-Based)

FR-PROFILE-1: Student profile includes:

- university/branch/semester
- skills/projects (basic fields)
- activity metrics (doubts asked, solved participation)

FR-PROFILE-2: Mentor profile includes:

- subjects
- solve rate, response time, avg rating
- reviews/feedback

FR-PROFILE-3: No “social feed” in MVP (no posts/likes LinkedIn clone).

4.8 Payments (Razorpay) — Later Phase

FR-PAY-1: Razorpay integration for:

- Priority doubts
- 1:1 sessions
- (later) tests, premium

FR-PAY-2: Transaction ledger.

FR-PAY-3: Refund/dispute hooks (minimal rules first).

LerenGO

4.9 Freelancing — Explicitly Deferred

FR-GIGS: Not in Phase 1–2. To be added after trust + profiles + moderation maturity.

4.10 Jobs/Internships — Later

FR-JOBS-1: Recruiters filter based on **evidence signals** (not bios).

FR-JOBS-2: Application uses LerenGO proof profile + campus outcomes (later).

4.11 Moderation / Governance

FR-MOD-1: Reporting for user/doubt/message.

FR-MOD-2: Admin panel for:

- report queue
- warning/strike/ban
- content hide/remove

FR-MOD-3: Block user.

FR-MOD-4: Audit log for moderation actions.

---

5. Non-Functional Requirements

Security & Privacy

- Campus content must be access-controlled by verified university email domain.
- Private threads are visible only to participants + admin.

Performance

- Doubt feed loads fast on low bandwidth.

- Image uploads enforce type/size limits.

Reliability

- Error logging + monitoring enabled in staging and production.

---

6. Phases of Development (Updated)

Phase 0 — Foundation (Week 1–2)

- Google/Apple auth
- domain verification
- DB + APIs skeleton
- uploads
- moderation primitives
- UI kit

Phase 1 — Core Guidance Loop (Weeks 3–5)

- post doubt → match → thread → solved → rating
- campus-only access enforcement

Phase 2 — Trust + Mentor System (Weeks 6–8)

- mentor onboarding + subjects
- reputation metrics
- improved matching
- admin workflows

LerenGO

Phase 3 — Campus Knowledge Base (Weeks 9–10)

- solved doubts searchable **within university**
- filters, basic ranking

Phase 4 — Payments (Razorpay) (Weeks 11–12)

- priority doubts
- 1:1 sessions
- ledger + refund hooks

Phase 5 — Outcomes (Later)

- tests, mastery, rankings

Phase 6 — Jobs/Internships (Later)

- recruiter module driven by evidence

Phase 7 — Freelancing (Later)

- only after governance + reputation is strong
